

Pukhovichi Integrated Bakery Plant JSC

About the Company

Pukhovichi Integrated Bakery Plant JSC is the largest grain processing enterprise in the Republic of Belarus that produces feed mixes, premixes and protein and vitamin and mineral additives for farm livestock and poultry. High quality of our products is confirmed with STB ISO 9001 - 2009 Quality Certificate.

Enterprise History

The history of the Integrated Bakery Plant started in 1948 when the Zagotzerno (grains procuring) enterprise was established in the city of Maryina Horka, Minsk region. In 1973, construction of a grain elevator with a capacity of 150,000 tons started. Its first stage was commissioned in 1974, followed by the second stage in 1975. December 1980 saw commissioning of the feed mix production complex capable to produce 630 tons per day. These were different enterprises first; however, in April 1982 the elevator and the feed mix factory were united to form the Pukhovichi Integrated Bakery Plant state enterprise. In 1994, the Pukhovichi Integrated Bakery Plant was reorganized into an open joint stock company.

Having completely modernized its production facilities, the enterprise increased its production capabilities to 800 tons per day; technological process management was computerized. It allowed providing high quality of the enterprise's produce. The Pukhovichi Integrated Bakery Plant JSC is a unique enterprise in the bakery product system due to its technological infrastructure. To improve its produce quality, a line was installed to add vegetable oil to feed mixes based on the weight batching principle; it was integrated in the common ATPCS (automated technological process control system) scheme. Lines were mounted to premix and batch grain and mealy raw components. In 1994, we constructed and commissioned the first line to produce premixes. In 1997 this line was reorganized to provide automated production of premixes, PVMA, LFA (lysine containing feed additives) with total capacity of 480 tons per month. To provide the population with services in selling feed mixes, commodity goods and other products, two manufacture's stores were opened in 1997. In 2007, we opened the third company store in Cherven district. The year of 2013 enjoyed opening of the fourth company's store. Alongside, we organized itinerant trade of feed mixes around the district with the use of our own transport.
